## **Global eProcure Recognized by NJBIZ Magazine as a Fast Growing Company**

---

Third appearance on the competitive list of New Jersey's fastest growing companies.

CLARK, NJ, November 17, 2008

Global eProcure has been honored for the fourth time as one of New Jersey's fastest growing companies by NJBIZ Magazine. Companies selected for inclusion on the list needed to meet certain revenue requirements during the past three fiscal years as well as provide evidence of revenue growth during the same time period. Dollar and percentage increases were taken into account when factoring in the companies honored on the list.

After nearly six years of consistently profitable revenue growth, Global eProcure has become a widely recognized name in the field of spend management technology and consulting. With a variety of Fortune 100 companies as clients, Global eProcure's reach has helped the company grow into a global firm with offices throughout the US, Europe, and Asia. "After finishing yet another successful year, we are thrilled to be recognized with this award," says Global eProcure CFO, Sam Gadodia. "The company's staggering growth has been one of the biggest challenges that we've had to manage, but this is the best problem that any company could hope to have. We wouldn't have it any other way," says Gadodia.

With a full suite of spend management technology offerings complemented by consulting expertise capable of addressing the most complex cost reduction issues faced by companies and governmental organizations, Global eProcure is well-positioned for ongoing future growth. "We have set very aggressive growth targets for the company in 2009, but I have no doubt that our employees will be able to make it happen," comments Gadodia.

### **About Global eProcure**

Global eProcure is a leading procurement services company offering a unique blend of consulting, technology, and procurement outsourcing. Our goal is to help our clients achieve their compliance and savings targets through tailored solutions that combine the right combination of innovative technology, industry expertise, and proven best practices.
